

REMARKS

This case has been carefully reviewed and analyzed in view of the Official Action dated 22 March 2007 and is supplemental to the Amendment filed 8 June 2007. At least Claim 1 of the Amendment filed 8 June 2007 did not have proper indications of that which was added and deleted. Accordingly, the amended Claims are presented herein and replace those previously submitted. Claims 1 and 10 have been amended and Claims 13-16 have been added. Claims 2-3 and 6-8 were previously cancelled.

Additionally, the Examiner conducted a telephonic interview with the Undersigned attorney on 11 July 2007 requesting a minor change to the language of Claim 1 in order to clarify the benefit of the fixing strips, that of maintaining said cathode and anode plates in registration prior to said application of heat. The aforesaid language was already present in the claim as a separate limitation.

The arguments made in the Amendment filed 8 June 2007 are not repeated herein, but are still applicable to the Claims presented in this Supplemental Amendment and incorporated by reference thereto.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectfully requested.

No fees are believed to be due with this Amendment. If there are any charges associated with this filing, the Honorable Commissioner for Patents is hereby authorized to charge Deposit Account #18-2011 for such charges.

Respectfully submitted,
For: ROSENBERG, KLEIN & LEE
